PROFILE

Senior graphic designer with 13+ years of production experience across digital, print and brand. For the last 4 years I've worked with international clients and teams entirely in English, taking briefs from product and marketing managers and turning them into final assets on fixed deadlines. I'm at my best when the brief is clear and the job is to execute it precisely: clean layered files, consistent naming, pixel-perfect output and fast adaptations across formats. I also write my own scripts to automate repetitive production, so high volume doesn't cost quality.
